Refine Chemicals Science and Technology Developing Co., Ltd.

About Refine Chemicals

Description

Refine Chemicals Science and Technology Developing Co., Ltd. (Refinechemicals) is a high-tech oriented company specialized in [Spec & Fine Chemicals](#) and [Custom Synthesis](#).

Under the lead of our rich experienced technicians, we have the ability in custom synthesis, scientific research, new product developing, bulk manufacturing and processing. Our advanced facilities allow us the flexibility to produce a wide range compounds from gram lots to metric ton lots. We specialized in the production of Benzene series and Heterocyclic series aromatic compounds which are widely used as Photo Chemicals, Electronic Chemicals, Cosmetic Raw Material and Coating & Additives etc...

We will always provide high quality products at competitive price via fast delivery. We are also partner and agent of many excellent Chinese manufacturers. We could organize different chemicals for you. Under our rich knowledge in manufacturing and quality control system, we can minimize the risk of quality dispute and delivery delay.

Our company has unified and concordant run system, scientific management, environment protection and customer service. Our tenet is "Quality First, Clients Paramount". Warmly welcome all friends from home and abroad to visit, negotiate and cooperate with us.

For more about us, you could find from the website about our [Safety production and Environment protection](#), [QC](#), [Production](#), [R & D](#), and [Custom Synthesis](#). Any question, please feel free to [contact us](#).

Safety production and Environment protection

Refinechemicals knows the importance of safety production and environment protection. We control these in scientific method and strict management system. At present, all the waste is made a pretreatment first in our production center, and then all kinds of waste will be centralized to disposal.

We have signed the contract with the chemicals waster disposal company. All the waster will be collected and treated to arrive the standard.

For more information, please feel free to [contact us](#).

Refine Chemicals Science and Technology Developing Co., Ltd.

About Refine Chemicals

QC

The objective of our quality policy is to meet high industrial standard by means of excellent control and management which are already acknowledged by our customers. Our laboratory is equipped with modern analytical devices that provide extensive analysis covering most customers' requests. All the batches are tested and controlled during each flow.

The QC center is in charge of raw material, half-finished and finished product inspection. The test instruments are HPLC, GC, UV, high precision analytical balance and 7520 spectrophotometer etc...

Other items, such as ICP, RAN, DNA, microorganism, etc., we will consign the third party to test.

Any question, please feel free to [contact us](#).

Refine Chemicals Science and Technology Developing Co., Ltd.

About Refine Chemicals

Production

The center owns multi- purpose workshops where high quality products are made and act as the base of new projects and new products.

Under the control of our excellent QC & RD department, our bulk production is guaranteed and our technology is continually improved. Enhancing the quality and saving the cost are our forever task.

天津瑞发化工科技发展有限公司

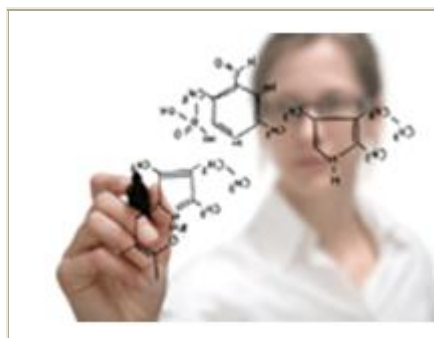

Refine Chemicals Science and Technology Developing Co., Ltd.

About Refine Chemicals

R & D

The R & D center has 2 labs (one is for research and one is for scale-up from small test) and 1 multi-purpose middle-test work-shop.

It is equipped with advanced instruments, such as GC (gas chromatography), HPLC (liquid chromatography), IR, HPLC-MS, GC-MS and NMR (400M) etc...

There are 16 senior technicians in our R&D department. 5 persons are of doctor's degree, 8 persons are of master's degree and 3 persons are of post doctor's degree. They are in charge of new product developing and custom synthesis. At the same time they also supply technology for the mass production, quality control and production improvement.

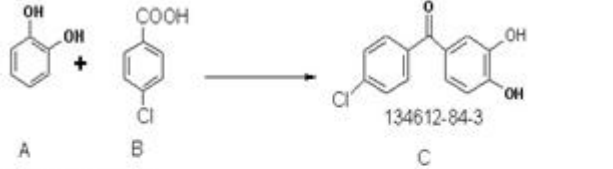

For more information, please feel free to [contact us](#).

Refine Chemicals Science and Technology Developing Co., Ltd.

About Refine Chemicals

 <p>JP06172252, 1992 A mixt. of A, B, ZnCl₂, and POCl₃ in sulfolene contg. a small amt. of water was heated at 50° for 2 h to give 90.2% 2,2',4,4'-tetrahydroxybenzophenone, vs. 70% yield in the absence of water. sulfolene: 77-79-2</p> 	 <p>The R & D center has close relation to the universities and scientific researching institutes. Under their help, the center gets more high technology to solve different problems.</p>
---	--

Custom Synthesis

Refine chemicals R & D dept. is located in Tianjin, P.R.China. New project Research & custom manufacturing are one of our main job, Refine chemicals backed by extensive technical information and service support, top-qualitatively offered custom syntheses from kilogram to tons tailored to our clients' specific needs. It serves the following markets:

- Manufacture of small-volume, complex organic compounds (0.01 to 20,000+ kilograms).
- Process and product improvement.
- new product research & developing
- High pure compounds ([low metal ions](#))
- Meeting customer's special requirements via refining the compound's Odor, Color, Turbidity, Heavy Metal and other spec. 舉 in our special methods.

Capability

1. We can perform the usual chemical processes with substantial experience in:
Benzene series Derivatives and Heterocyclic compounds (especially aromatics)
2. We would like to be considered for the synthesis of the compounds bearing the following market:

Refine Chemicals Science and Technology Developing Co., Ltd.

About Refine Chemicals

- Photo chemicals
- Coating and additives
- Electronic Chemicals
- Cosmetic Raw Material
- API'S
- SPEC & Fine Chemic
- Pharmaceutical Raw Material
- Polymer Raw Materials

3. Spec chemicals (As customer's special requirements via refining the compound's Odor, Color, Turbidity, Heavy Metal and other spec. in our special methods.)

4. Very iustral ([low metal ions](#)) and high pure compounds.

In addition to our product line, customer requirements for new compounds on a confidential or proprietary basis comprise a significant portion of our new business. Scale-up from laboratory procedures or improvements in a customer's process result in development quantities, Refine chemicals will grow with customer requirements to fill commercialization requirements.

For more about us, you could find from the website about our [QC](#), [Production](#), [R & D](#). Any question, please fell free to [contact us](#).
